PROFESSIONAL SUMMARY

Python Full Stack Developer with 1+ year of production experience shipping Django and FastAPI applications that serve active enterprise clients. Specialised in async architectures (ASGI/Uvicorn), biometric AI systems (DeepFace, Qdrant vector DB, anti-spoofing), real-time GPS microservices, RFID hardware integration, LLM-powered chatbots, and government-compliant APIs. Delivered 6 live production applications at MR Softwares across legal tech, healthcare, hospitality, and SaaS — not side projects, real client deployments.

WORK EXPERIENCE

Python Full Stack Developer

MR Softwares | Ujjain, MP | May 2025 - Present

- Shipped 6 production Django applications serving active paying clients across legal tech, healthcare, hospitality, and WhatsApp SaaS — all live since May 2025.
- Built an async Django (ASGI/Uvicorn) biometric attendance system using DeepFace for facial extraction, Qdrant vector database for sub-second face matching, and silent-face anti-spoofing to block photo and video replay attacks.
- Engineered LatLong, a Django/DRF GPS microservice bridging Traccar GPS server, OpenSearch telemetry storage, and live dashboards with automated geofencing alerts for real-time fleet and staff tracking.
- Built Waahapp (service.waahapp.com), a WhatsApp Business SaaS on Meta's official API with Celery scheduler, webhooks receivers, and multi-tenant messaging for third-party clients.
- Delivered SCS App (scsapp.in), scraping and parsing live court cause lists to push real-time case update notifications to advocates — replacing a fully manual lookup process.
- Integrated RFID encoder/reader hardware directly with Django to program hotel door lock key cards in the Nitiraj hotel management system, bridging software with embedded hardware.
- Deployed an LLM-based support chatbot for eSchool that automated repetitive staff queries and reduced manual support ticket volume on the platform.
- Managed Oracle Cloud Infrastructure (OCI) object storage for secure enterprise document and media persistence across multiple client deployments.
- Optimised Django ORM queries and eliminated N+1 bottlenecks across high-volume enterprise record sets, reducing API response latency measurably across production services.

Python Developer Intern

CodeAlpha | Remote | Oct 2023 - Jan 2024

- Built reusable Python automation scripts for recurring data processing pipelines, reducing manual workflow time by 15% and eliminating error-prone steps across team operations.

Software Engineer Intern

Oasis Infobyte | Virtual | Apr 2023 - May 2023

- Delivered 3 client-facing web projects (landing page, portfolio, temperature converter) within a strict 30-day deadline using Python, HTML, CSS, and JavaScript.

PROJECTS

eSchool Biometric and AI Attendance System

Django, ASGI, Uvicorn, DeepFace, Qdrant, MySQL, OpenCV, Anti-Spoofing | Nov 2025 - Present | MR Softwares

- Architected a fully async Django (ASGI/Uvicorn) attendance platform handling selfie and group photo verification at production scale using DeepFace for facial feature extraction and Qdrant vector database for sub-second face matching across thousands of enrolled records.
- Implemented silent-face anti-spoofing to block photo and video replay attacks, eliminating proxy attendance and increasing verification integrity for schools.

- Deployed an LLM-based chatbot that automated repetitive school staff support queries, reducing inbound manual support tickets on the platform.

LatLong - Real-Time GPS Tracking Microservice

Django, Django REST Framework, Traccar, OpenSearch, Geofencing | MR Softwares

- Built a Django/DRF microservice acting as middleware between a Traccar GPS server, OpenSearch for high-frequency telemetry storage, and live client dashboards with automated geofencing alerts.
- Designed OpenSearch indexing strategy for GPS telemetry to support fast time-series queries across continuous location data streams.

Waahapp - WhatsApp Business SaaS Platform

Django, Meta WhatsApp Business API, Celery, PostgreSQL, Webhooks | May 2025 - Present | service.waahapp.com

- Full-featured WhatsApp messaging SaaS using Meta's official Business API enabling bulk and triggered client messaging, with complete backend stack: REST APIs, Celery scheduler, webhook receivers, and multi-tenant database architecture.

SCS App - Legal Cause List Delivery Service

Django, BeautifulSoup4, Scrapy, PostgreSQL | Sep 2025 - Present | scsapp.in

- Legal tech platform scraping and parsing court cause lists in real time, delivering automated case update notifications to advocates and replacing a manual daily lookup process.

Nitiraj - Hotel Management and RFID Door Lock System

Django, Python Desktop GUI, RFID Encoder/Reader Hardware, Oracle OCI | Dec 2025 - Present | nitiraj.mrsoftwares.in

- Full-stack hotel management system with direct RFID hardware integration, programming key cards via encoder/reader interfaces to control physical door locks — bridging Python application logic with embedded hardware in one deployable system.

MAA - Government Child Nutrition Monitoring System

Django, Data Visualisation, WHO Growth Standards, PostgreSQL | Dec 2025 - Present

- Government-facing health dashboard calculating child malnutrition status against WHO growth standards and visualising growth metrics across thousands of records to support official data-driven intervention decisions.

Web Application Vulnerability Scanner

Python, BeautifulSoup4, Requests | Feb 2025 - Apr 2025

- Automated web crawler-based security scanner identifying SQL injection (SQLi) and cross-site scripting (XSS) vulnerabilities across target web applications without manual URL-by-URL inspection.

TECHNICAL SKILLS

Backend: Python, Django, FastAPI, Flask, Django REST Framework (DRF), Celery, ASGI, Uvicorn

Databases: MySQL, PostgreSQL, SQLite, OpenSearch, Qdrant (Vector Database)

Cloud & Infra: Oracle Cloud Infrastructure (OCI), Amazon Web Services (AWS), Docker, Linux, Shell Scripting

AI / ML: DeepFace, OpenCV, Large Language Models (LLMs), Machine Learning, Deep Learning, Computer Vision, Anti-Spoofing

Web Scraping: BeautifulSoup4, Scrapy, Selenium WebDriver, Requests

Hardware: RFID Encoder/Reader Integration, Biometric Device Integration

Frontend: HTML5, CSS3, JavaScript

Tools: Git, GitHub, Postman, REST APIs, Webhooks

EDUCATION

B.Tech in Computer Science and Information Technology | GPA: 7.50/10

IES IPS Academy, Indore | 2021 - 2025

Senior Secondary (Class XII) - Science (PCM)

RPM Academy, Gorakhpur | 2019 - 2021

CERTIFICATIONS

Python Developer Associate (PDAC-24) | ITechCert / AICERT | Jul 2024

Computer Vision Builder | IIT Delhi (FITT / MP-IITD) | Mar 2024
